

FLEXIBLE

Better for angle changes and working around penetrations

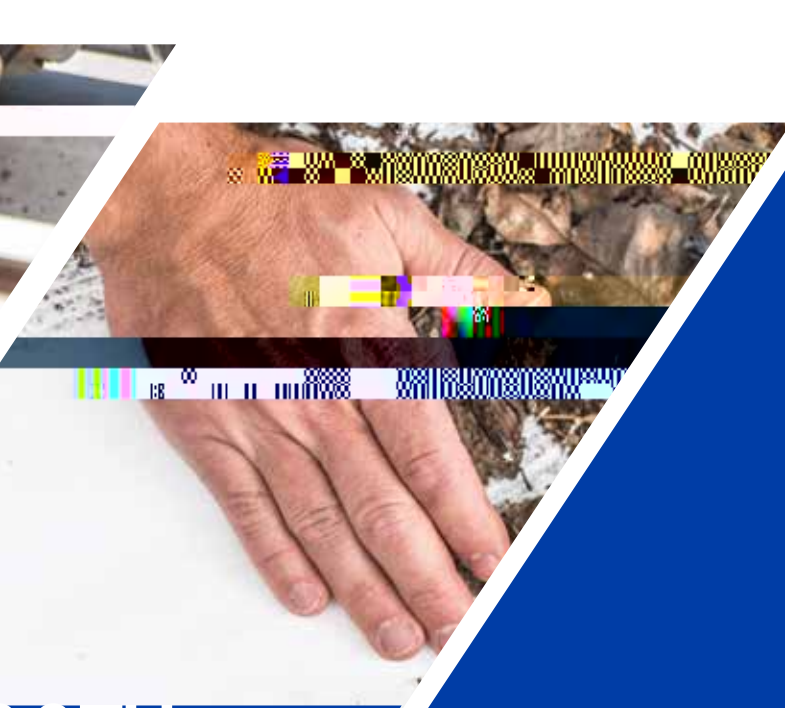

- Superior strength and durability
- High resistance to tearing and puncturing
- Consistent performance in all environments

WELDABLE

Consistent welding lets you work in optimum conditions and the harshest environments

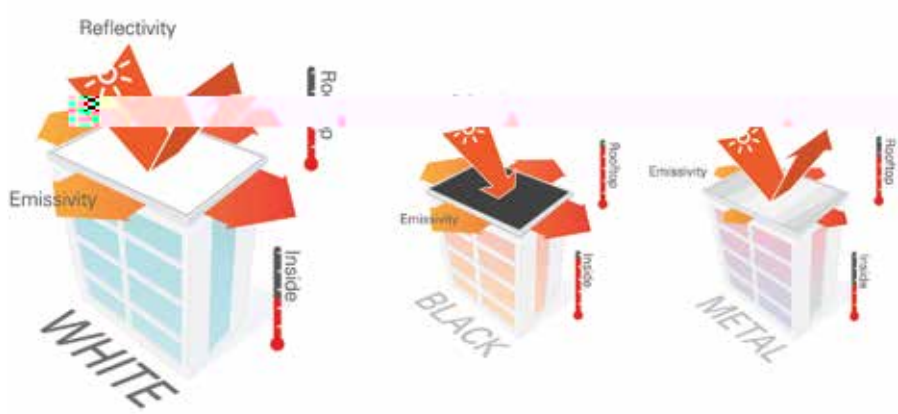

- Superior strength and durability
- High resistance to tearing and puncturing
- Consistent performance in all environments

SMOOTH

Smoother sheets make compliance for initial reflectivity easier

- Superior strength and durability
- High resistance to tearing and puncturing
- Consistent performance in all environments

MORE RELIABLE. LESS WASTE.
